

FACILITIES PLANNING

The School Board provides for the erecting, furnishing, equipping, and maintenance of all school facilities.

The superintendent presents to the School Board annually, or as necessary to coordinate with the planning process of the appropriating body, a Capital Improvement Program which includes recommendations regarding timing, location, costs and savings associated with:

- new building requirements
- restoration and renewal of existing school facilities

The superintendent may make recommendations for new buildings and renovations after receiving input concerning facilities utilization, development and closure from the community.

Recommendations are supported by data that supports the feasibility and need for construction and/or renovation.
